Grade 8 English Language Arts

I. Introduction/Overview/Philosophy

This curriculum is designed to provide students with the opportunity to develop appropriate skills in writing, reading, viewing, word knowledge, listening, research, and speaking skills as they prepare for a more independent role as high school students. Through the use of a writing text, class discussion, collaborative learning, and traditional literature (fiction, informational, literary nonfiction) students will increase their reading, verbal and communication skills through an exploration of literature. Building on previous skills, the students will continue to use the writing process skills to create writing samples of varied types. Students will also synthesize information and comprehend more complex texts in reading.

During this course, the study of literature, author and literary techniques will intensify, and vocabulary development will be stressed. Learning will be an interactive activity involving students and teachers. By focusing on the student's ability to write and providing ample opportunities to use critical thinking skills, the curriculum will prepare the students for future academic challenges.

Additionally, students will be exposed to varied activities and means of instruction that will emphasize high level thinking skills in order for students to better analyze, synthesize, and evaluate. Reading is a complex process through which readers actively construct meaning and connect with others' ideas. These ideas may be presented in written, oral, aural and/or viewing forms. A competent reader is a reader who integrates information in the text with what he or she already knows. In order for reading to be meaningful and purposeful, students will be encouraged to have a voice and choice in selecting material to be read in order that a strong "reader" connection is made.

Enabling students to construct meaning from the text is a major goal in this course of study. This will be accomplished using various means of instruction that will emphasize discovery, discussion, and evaluation. Active participation by the students is essential in developing the life long skill of reading.

All students will read books/novels that consist of fiction, non-fiction and literary non-fiction. The curriculum consists of units of study that incorporate skills and strategies that give the students opportunities to learn and become more proficient readers. Through the various readings, students will be required to extend their understanding/comprehension in their writing.

**NEW JERSEY STUDENT LEARNING STANDARDS
ENGLISH LANGUAGE ARTS**

Grade 8

The standards define general, cross-disciplinary literacy expectations that must be met for students to be prepared to enter college and workforce training programs ready to succeed. The K–12 grade-specific standards define end-of-year expectations and a cumulative progression designed to enable students to meet college and career readiness expectations no later than the end of high school.

Students advancing through the grades are expected to meet each year’s grade-specific standards, retain or further develop skills and understandings mastered in preceding grades, and work steadily toward meeting the more general expectations described by the standards.
